

KSU Air Quality Permit requires us to verify that all diesel fuel used on campus has a maximum sulfur content of 15 ppm (0.0015% by weight) and a minimum CETANE Index of 40 or maximum aromatic content of 35%. To meet these requirements every shipment of diesel fuel on campus shall be verified as to its compliance with these conditions. Verification shall be in the form of certification of each fuel delivery by the supplier.

This form, therefore, shall be completed and signed by the supplier for each delivery, before offloading the fuel. It serves as documentation that the fuel being delivered is distillate oil which meets the above stated conditions.

Delivery Date		Delivery Location	
Fuel Type		Delivery Amount (Gallons)	
Received By: <i>(KSU Personnel)</i>		Signature	
Suppliers Name			

Supplier Certification (To be completed before offloading the fuel)

By signing this form I verify that sulfur content of this delivery is $\leq 0.0015\%$ (15ppm) and that CETANE Index ≥ 40 or that aromatic content $\leq 35\%$.
