

KSU Air Quality Permit requires the University to maintain monthly records of quantity of propane and coke burned on all fuel burning equipment. To meet this requirement, the amount of coke and propane used on the Iron Cupola should be recorded. The alternative is to maintain record of propane and coke delivered.

This form, therefore, helps in recording the required information. It should to be completed for each fuel use of the furnace.

Furnace Information			
Make	Iron Cupola	Model	
Rating (Kw/HP)		Fuel Type	
Owner/Operator Information			
Department Name		Contact Person	
Tel #			
Operation Information			
Date	Event/Activity	Coke Used (lb)	Propane Used (ft ³)
